

# Protective Infused Jelly

3302001/06 – R0154XX

Fresh and melting texture  
Fast penetration

Protective Infused Jelly and Radiance Milky Essence create the perfect duo for a youthful and radiant skin. Used as DayCare, the refreshing, and non-greasy texture combines the lightness of a gel with the comfort of a cream. It is perfect for protection against the deleterious effects of blue light thanks to **BLUESHIELD®** while **ESSENC'AGE®** helps fight against the appearance of the first wrinkles.

Phase	Ingredients	INCI name	%	Functions
A	Demineralized water	<i>Aqua (water)</i>	QSP 100	/
	Preservative	/	QSP	Preservative
	<b>ESSENC'AGE®</b> (Solabia Group)	<i>Ascophyllum nodosum extract</i>	<b>0.20</b>	<b>Longevity Booster active ingredient</b>
	<b>BLUESHIELD®</b> (Solabia Group)	<i>Glycerin (and) Capsicum annuum fruit extract (and) Xanthum gum</i>	<b>2.00</b>	<b>Blue light shield active ingredient</b>
	1,3 Propanediol cosmos (Connect Chemicals)	<i>Propanediol</i>	3.00	Humectant
	Sepimax zen (Seppic)	<i>Polyacrylate crosspolymer-6</i>	1.00	Gelling agent
B	Emogreen L19 (Seppic)	<i>C15-19 Alkane</i>	2.00	Emollient
	Perfume ess 18481 (Nactis)	<i>Parfum (Fragrance)</i>	0.20	Perfume
C	Sodium hydroxide solution 1%	<i>Aqua (water) / Sodium hydroxide</i>	QSP pH	pH corrector

### Procedure

1. Prepare phases A and B at room temperature.
2. Make the emulsion by pouring phase B into phase A under vigorous agitation.
3. Adjust the pH with phase C if necessary.

### Physico-chemicals characteristics

pH: 5.8 – 6.2 at 20°C

η: 11 000 – 13 000 cP at 20°C, LVT 4, 12 rpm

\*Contains more than 95% natural ingredients

### Active ingredients

**ESSENC'AGE®**: fucoidans of low molecular weight, obtained from the brown organic seaweed *Ascophyllum nodosum*, ESSENC'AGE® fights against the appearance of the first wrinkles.

**BLUESHIELD®**: red bell pepper extract rich in carotenoids and particularly in capsanthin, BLUESHIELD® protects the skin from the major deleterious effects of blue light: photo oxidation and photoreceptor dysfunction.

### Important note:

This formula is given as example and its use as well as the products which it suggests should not be taken as an inducement to infringe any existing patent. Although this formula has been conceived with the greatest care and has been to stability tests, we recommend that it be validated (safety, stability) before any potential commercialization. In no event shall Solabia be liable for any damage of any kind, whether direct or indirect, regardless of its cause, origin, nature or consequences origins, resulting from the use or the failure of the product.

# Radiance Milky Essence

3312001/06 – R0155XX

Evanescent touch  
Non-sticky finish

Radiance Milky Essence et la Protective Infused Jelly create the perfect duo for a youthful and radiant skin. Used as night care, the Milky Essence, with its evanescent texture, helps to restore a detoxified, luminous and rested skin as soon as you wake up thanks to the combined action of **ESSENC'AGE®** and **DETOXI-LOOK®**.

Phase	Ingredients	INCI name	%	Functions
A	Demineralized water	<i>Aqua (water)</i>	QSP 100	/
	Preservative	/	QSP	Preservative
	1,3 Propanediol cosmos (Connect Chemicals)	<i>Propanediol</i>	3.00	Humectant
	Solagum tara (Seppic)	<i>Caesalpinia spinosa gum</i>	0.15	Gelling agent
	Moispray C (Daito Kasei Europe)	<i>Microcrystalline cellulose / Cellulose gum</i>	0.50	Gelling agent
B	Montanov L (Seppic)	<i>C12-20 Alkyl glucoside / C14-22 Alcohols</i>	2.00	Emulsifier
	Floraesters 15 (Floritech)	<i>Jobaba esters / Tocopherol</i>	2.00	Emollient
	Floramac 10 (Floritech)	<i>Ethyl macadamiate / Tocopherol / Malic acid</i>	2.00	Emollient
	Cetiol CC (BASF)	<i>Dicaprylyl carbonate</i>	3.00	Emollient
C	DETOXI-LOOK® (Solabia Group)	<i>Glycerin / Bellis perennis (daisy) / Flower/Helichrysum italicum extract / citric acid</i>	1.00	Detoxifying and illuminating active ingredient
	ESSENC'AGE® (Solabia Group)	<i>Ascophyllum nodosum extract</i>	0.20	Longevity booster active ingredient
	Demineralized water	<i>Aqua (water)</i>	2.00	/
D	Perfume ess 18481 (Nactis)	<i>Parfum (fragrance)</i>	0.10	Perfume
	Sodium hydroxide solution 1%	<i>Aqua (water) / Sodium hydroxide</i>	QSP pH	pH corrector

## Procedure

1. Prepare phases A and B at 70°C.
2. Make the emulsion by pouring phase B in phase A under vigorous stirring.
3. At 45°C, incorporate phase C elements, ESSENC'AGE® will be previously solubilized in a small quantity of water.
4. At 35°C, add the perfume and adjust the pH if necessary.

## Physico-chemicals characteristics

pH: 6.0 – 6.5 at 20°C

η: 3 000 – 4 000 cP at 20°C, LVT 3, 12 rpm

\*Contains more than 95% natural ingredients

### Active ingredients

**ESSENC'AGE®**: fucoidans of low molecular weight, obtained from the brown organic seaweed *Ascophyllum nodosum*, ESSENC'AGE® fights against the appearance of the first wrinkles.

**DETOXI-LOOK®**: a plant complex obtained by cold-pressing daisy flowers (*Bellis perennis*) and everlasting flowers (*Helichrysum italicum*), DETOXI-LOOK® stimulates the skin's detoxification system, illuminates by reducing redness and moisturizes to reveal the radiance of the duller skin.
